EDISON HAS A NEW ONE .- Thomas A. Edison, at his bome in Orange, N. J., lest night, said he had at last attained what he had been working on tained what he had been working on for years, the ideal storage battery, and believed that it would revolutionize all trace ion railway processes. The peculiarities of this new battery, he said, were first that weight had been gotten rid of, there being required only 55 pounds per horse-power per hour, and in the second place indestructibility. While the life of the precent storage battery varied from a few months to a year or two, the longest life being only six or seven years, in his battery there was absolutely no deterioration. Again, there was a great gain in the time required for recharging, a one horse-power motor being capable of being charged in an hour for a run of 30 miles.

MONUMENT TO CAPT. JOHN SMITH .-At the meeting of the Sons of the American Revolution in Richmond on Friday night, a motion was made by Mr. A. B. Clarke that the committee, which had been appointed earlier in the evening, to take up the matter of the Jamestown celebration, in 1907, he requested to consider also the project of raising \$10,000 for the erection of a monument to Capt. John Smith. It was emphasized that the unveiling of this monument should be the leading feature of the great celebration, which is now in its inciplency. As a starter, \$50 was appropriated out of the tressury of the society for the monument fund, and a promise of more from time to time as the movement grew. American Revolution in Richmond on
